INDEXED. PRICE LIST ...

Riverside Nursery

M. J. GRAHAM, Proprietor.

ADEL, IOWA.

INDEXED.

Location:

Adel is situated upon the Des Moines, Northern and Western Railway—(C. M. & St. P. system,) 22 miles west of Des Moines. We have direct connection with all railway lines traversing the state, and our shipping facilities are unsurpassed.

Six furnished at dozen, and 50 at 100 rates. Rates on larger quantities than herein quoted will be given on application. Please order early.

TERMS CASH—Remit by P. O. order or bank draft.

REFERENCE—Dallas County Savings Bank.

FRESH FRUITS IN THEIR SEASON.

APPLES.

Plant on good, well drained soil. Set a little deeper than the trees stood in the nursery, and lean toward the one o'clock sun. Give thorough cultivation, mulch during drouth, and after the trees come into bearing, apply well-decomposed manure annually to the surface of the soil. For profit, plant largely of the winter varieties.

Standard Apples. 5 to 6 feet, \$2.50 per dozen; \$18.00 per hundred; 4 to 5 feet, \$2.00 per dozen; \$15.00 per hundred; 3 to 4 feet, \$1.50 per dozen; \$10.00 per hundred.

Select List, Named in Order of Ripening.

Summer—Yellow Transparent, Red Astrachan, Red June, Sweet June, Duchess Ol., Chenango Strawberry, Benoni, Red Bietigheimer, Dyer, Reswick Codlin, Early Joe.

Fall—Maiden's Blush, Wealthy, Fall Orange, Ramsdell's Sweet, Wolf River, Haas, Snow.

Winter—Rambo, Northern Spy, Yellow Bellflower, Grimes Golden, Roman Stem, Wagener, Fulton, R. I. Greening, Jonathan, Rome Beauty, Paradise Winter Sweet, Pewaukee, Price's Sweet, Scott's Winter, Northwestern Greening, Stark, American Beauty (or Sheriff) Mo Pippin, Winesap, Minkler, Rall's Genet (Geneton) Gano, Ben Davis, York Imperial and others.

NEW AND RARE VARIETIES.

Colton—Medium size, yellow, with red blush. Ripens ten days before Early Harvest, and is FAR BETTER in quality. Tree perfectly hardy and an annual and abundant bearer. 2 years 4 to 6 ft., 30c each; \$3.00 per dozen.

Fanny—Large, round, bright red. "Superior to most early apples in both beauty and quality." August. Tree a model of health and vigor. 2 years, 5 to 6 feet, 30c each; \$3.00 per dozen.

Jefferis—Medium size, yellow, striped with crimson. Flesh fine grained, juicy, aromatic, delicious. Good for table and market during August, September and October. 2 years, 4½ to 6 ft., 30c each; \$3.00 per dozen.

Winter Banana—A new and valuable winter apple, originated in northern Indiana. Fruit large, fine grained, smooth, golden yellow, slightly shaded with orange red; the finest flavored and perfumed apple yet discovered. It has a pronounced Banana flavor. 2 years, 5 to 7 ft. top grafted on Haas, 50c each; 2 year buds 5 to 6 ft. 35c each; \$3.50 per dozen.

Arkansas Beauty—"A beautiful new apple. Vigorous and prolific. Large size, dark crimson. Fine grained, rich; very good to best." Early winter, 5 to 6 ft. 25c each; \$2.50 per dozen; \$20.00 per 100.

Kinnaird—A red winter apple of superb quality. Tree hardy, bears early and is very productive. 5 to 6 feet, 30c each; \$3.00 per dozen.

Seevers—Medium to large, greenish yellow, with blush. Best in quality. Tree hardy and productive. December to March; 5 to 6 feet, 30c each; \$3.00 per dozen.

Babbitt—Tree vigorous, hardy, prolific. Fruit large, bright red, juicy and rich. Ripens after Winesap. Tested 50 years in Illinois, Iowa and Missouri. 2 years, 5 to 6 ft., 25c each; \$2.50 per dozen; \$20.00 per 100; 3 years, 5 to 7 ft. 30c each; \$3.50 per dozen, \$25.00 per 100.

American Blush—Medium to large size, oblate, beautiful crimson on yellow skin, superlative quality, hardy and productive. Season, January to May. 6 to 7 ft. top grafted, 35c each; \$3.50 per dozen.

Akin [Akin Red]—Size and color much like Jonathan but keeps three months longer; quality even better than that most excellent apple. The best by far of all late keepers. The apple for hotel and fancy trade. Ill. Hort. Society. 2 years, 4 to 5 ft. 20c each; \$2.00 per dozen; \$16.00 per 100. 3 years, 5 to 7 ft. 25c each; \$2.50 per dozen; \$20.00 per 100.

Mammoth Black Twig—Resembles Winesap, yet excels it in nearly every point. A better and stronger grower, fruit much larger, darker red, fine quality, and a remarkable keeper. Valuable for market. 2 years, 4 to 5 ft. 20c each, \$2.00 per dozen; \$16.00 per 100. 3 years, 5 to 6 ft. 25c each \$2.50 per dozen, \$20.00 per 100.

Hyde's King of the West—Large to very large, handsome, yellowish green, good quality, a remarkable keeper, fruit of two seasons growth having been exhibited side by side. Trees vigorous and hardy. 2 years 4 to 5 ft. 20c each, \$2.00 per dozen, \$16.00 per 100. 3 years, 5 to 6 ft. 25c each, \$2.50 per dozen, \$20.00 per 100.

Crab Apples—Hyslop, Martha, [very fine] and Whitney's No. 20, 5 to 6 ft., first class, 25c each.

Florence: new, best crab known. 35c each.

PEARS.

The fact has been demonstrated that Pear growing is a success in Iowa, when the same care is given in the selection of varieties, soils, and situations, that is given in the successful culture of the apple.

The Pear succeeds best on high, well drained soil, with yellow clay subsoil. Plant deep enough to cover point when budded about four inches, give good cultivation, fertilize with wood ashes, and annually, about July 1st, wash the stems and main branches with whitewash, to which a little sulphur has been added. Where trees make a strong growth, say three or four feet annually, the shoots should be cut back about one-half their length, each spring, before new growth begins. This will cause the trees to grow stocky and force them into early bearing, after which seed ground to clover.

The Pear is not subject to attacks of the borer, and with the exception of blight, is less liable to disease than the Apple.

Should blight appear, cut out the affected branches and BURN AT ONCE.

STANDARD TREES (on Pear Roots) in order of ripening.

✓ **Koonce**—New, origin Illinois. Remarkable for **HARDNESS** and **VIGOROUS GROWTH**. Fruit medium to large, good quality, ripens early in July, and does not rot at the core as do most early pears. 2 years, 5 to 6 ft. 40c each; \$4.00 per dozen.

✓ **Tyson**—Above medium, melting, juicy and sweet, tree vigorous and remarkably free from blight. August, 5 to 6 ft. first class, 40c each; \$4.00 per dozen.

✓ **Lincoln**—The original tree in Illinois, is of great size and has produced in a single season 50 bushels of pears which sold for \$2.50 per bushel, making \$125.00. Trees hardy and free from blight. Fruit large, juicy and good, season early Sept. 1 year trees, 3 to 4 ft., first class; 30c each; \$3.00 per dozen; 2 years, 5 to 6 ft., 50c each, \$5.00 per dozen.

✓ **Bartlett**—An old favorite. Large, buttery, juicy, high flavored; early Sept. 5 to 6 ft., first-class, 40c each; \$4.00 per dozen.

✓ **Seckel**—Small, but of highest quality. Tree of slow growth, hardy and free from blight. September. 4 to 5 ft., first class, 40c each, \$4.00 per dozen.

✓ **Howell**—Tree vigorous, hardy and productive. One of the finest American Pears. Large melting and sweet. September. 5 to 6 ft., first-class, 40c each; \$4.00 per dozen.

✓ **Beurre du Pont**—Origin uncertain. A tree planted in northern Illinois in 1839, still lives and bears fruit, large, pyriform, flesh melting, juicy and of good quality, season October. Hardy and free from blight. Worthy of extensive trial in the west. 4 to 5 ft., 40c each; 5 to 7 ft. 50c each.

✓ **Sheldon**—Large, round, melting rich and delicious, tree hardy, vigorous; erect and handsome; one of the best. Ripens in October and November. 5 to 6 ft., first-class, 40c each; \$4.00 per dozen.

✓ **Anjou**—Tree vigorous and hardy. Fruit large, buttery, melting and of high quality, Nov. and Dec. Conceded to be one of the most valuable pears in the whole list. 5 to 6 ft. first-class 40c each; \$4.00 per dozen.

✓ **Kieffer**—Notwithstanding the claim of some people that this pear is "not hardy," it has withstood 30 degrees below zero, without injury, and is fruiting heavily in the south half of the State. Tree remarkable for its health, vigor and productiveness; fruit large and fine for canning. Nov. and Dec. 4 to 5 ft. first-class, 30c each; \$3.00 per dozen; 6 to 7 ft. extra, 40c each; \$4.00 per dozen.

✓ **Mt. Vernon**—An American pear, seedling of Winter Nelis, but averaging twice as large. Tree hardy and productive, fruit melting, with spicy, vinous flavor. Mid-winter. 5 to 6 ft. first-class, 40c each; \$4.00 per dozen.

DWARF PEARS.

The trees are grown by budding the pear upon Quince roots. The result of this union dwarfs the TREE but NOT THE FRUIT, which is often finer upon the dwarf than upon the Standard trees of the same variety. This is notably the case with the Angouleme. Plant the tree deep enough that the point of union will be from 4 to 6 inches below the surface. This is important. Dwarfs may be planted 8 or to 10 feet apart, are especially desirable for small lots or gardens, and usually begin to bear the next year after planting. Prices: First-class trees. 4 to 5 feet, well branched 40c each; \$4.00 per dozen. 3 to 4 ft., 30c each; \$3.00 per dozen.

Angouleme—(Duchess)—One of the largest and finest pears in cultivation. Season, October. More extensively grown than any other variety; as a dwarf.

Additional varieties—**Anjou, Howell, Mt. Vernon and Tyson**. For descriptions see standard Pears.

CHERRIES.

Cherries, like Pears, succeed best, when planted on high, well-drained soil. Plant deep enough to cover point where budded about four inches. Train with **LOW HEADS**. Have tested thirty varieties of Cherries. Here is the cream of the list:

Two year trees, 4 to 6 feet, first class, 40c each; \$4.00 per dozen.

Two year trees, 4 to 5 feet, second class, 30c each; \$3.00 per dozen.

✓ **Deyhouse**—I have fruited this variety several seasons, and regard it so much superior to the Early Richmond, being earlier, larger and better quality.

Early Richmond—Well known, productive, a valuable. Mid-season.

✓ **Montmorency** (ordinaire)—Large, light red, excellent quality, and ripens ten days later than Early Richmond.

English Morello—Large, late, black, fine for canning.

✓ **Wragg**—First brought to notice in this county. The original trees have a record of twenty years without a failure to produce fruit. Closely resembles English Morello, yet distinct. Very valuable.

PLUMS.

Plant closely of different varieties to insure fertilization of blossoms. Manure heavily and give clean cultivation.

The following list, although short, comprises the best varieties in cultivation in order of ripening.

Price, 5 to 6 feet, 40c each; \$4.00 per dozen. 4 to 5 feet, 30c each; \$3.00 per dozen, except where noted.

Red June—Extra early, large, bright red. Most hardy and valuable of the Japanese Plums.

Milton—Resembles Wild Goose and ripens just before it. Valuable for early market.

Wild Goose—Large, bright red, well known. Ripens last half of July.

Poole's Pride—surpasses Wild Goose and ALL OTHERS of the Chicaw class. Fruit large, bright red, of excellent quality. Tree hardy and a regular bearer of enormous crops.

Charles Downing—Large, round, bright red. Will probably supersede Wild Goose as it is more hardy in tree, and superior in fruit.

Hunt—(Hunt's Hybrid) NEW—Originated with Henry Hunt, of this county, from seed of Wild Goose Plum, believed to have been pollenized by the Lombard. Fruit large, to very large bright red, overspread with a delicate bloom. Flesh yellow, FIRM, sweet and rich. When cooked the skin separates from the flesh, and the sauce is entirely free from the acidity so objectionable in pure native plums. Tree hardy and productive, and does not split down like the Wild Goose.

This is not an untried novelty, but has been TESTED TEN YEARS, as the originator would not send it out until he KNEW it was worthy. Ripens Aug. 1st to 15th.

Prof. Budd says of the Hunt plum: "It is by far the finest plum of the Chicaw species we have ever seen, and the best in quality."

First-class trees, 2 years from bud, well branched; price 5 to 7 ft. 50c each; \$5.00 per dozen.

Hammer—Large, round, light red, excellent quality, nearly freestone. One of the best for either home or market.

Wyant—A native of Iowa, very large. Fine quality and a perfect freestone. Last of Aug.

Stoddard—Very large, round, yellow, overspread with red. Last of August.

Newton—A new variety of the Americana type. Very large, red, freestone, of the best quality. Prolific and unfailing cropper. 50c each.

Wickson—(Japanese) Vigorous, upright tree, bears at one year from bud. Fruit very large, dark red and of finest quality; NEW. 50c each.

Lombard—Large, violet red, very productive. One of the best foreign varieties; late.

Miner—Large, deep red, very productive. Standard late variety.

PEACHES.

The abundant crops of peaches produced in this county during recent years bears witness to the fact that the limit of the "peach belt" is being extended northward. The following list comprises the hardiest varieties of known value, ripening in order named:

4 to 6 feet, first-class, 30 cents each; \$3.00 per dozen.

3 to 4 feet, second class, 20 cents each; \$2.00 per dozen.

Triumph—A new, yellow freestone peach, ripens very early. Blooms late. Fruit large with small pit. Flesh firm and of fine quality.

Champion—Originated in Illinois where it has produced full crops when all others failed to bear. Large, white, freestone, delicious.

Bokara—(No. 3)—Raised from seed which came from Asia. Very hardy, having fruited after the buds were exposed to a temperature of 28 degrees below zero. Fruit large, yellow, freestone, excellent.

Elberta—Very large, yellow, freestone; of high quality. Very hardy in tree and fruit bud.

Fitzgerald—Originated in Canada, fully outside the peach belt, where the original tree has produced five successive crops. Fruit large, with very small pit. Flesh yellow and of superior quality. Bears very young. One year old trees planted in my own orchard in spring of '97, are well filled with fruit buds which show but slight injury after exposure to 20 degrees below zero. First-class trees 40c each; \$4.00 per dozen.

Mitchell—For several years past my attention has been directed to a fine peach grown by the late William Mitchell, about ten miles from here.

Reproduces itself from seed, the fruit from the several trees in orchard being almost indistinguishable in size and quality. Trees seldom fail to bear a crop. Fruit medium to large, being double the size of ordinary "seedlings." Pale yellow with red blush, excellent quality, freestone. Ripens September 15th to 25th. The trees offered this year are seedlings, being the fourth generation of hardy, acclimated trees.

5 to 6 ft., heavy, 40c each; \$4.00 per dozen.

4 to 5 ft., 30c each; \$3.00 per dozen.

3 to 4 ft., 20c each; \$2.00 per dozen.

QUINCES.

Orange, 4 to 5 ft., 30c each; \$3.00 per dozen.

Meeches, 3 to 4 ft., 30c each; \$3.00 per dozen.

MULBERRIES.

New American—Fruit large, often one and one-half to two inches in length, juicy, rich and sweet. Tree of vigorous, upright growth, bears early and continues in fruit from June to Sept. Valuable for shade and fruit. 2 year trees, 5 to 7 ft. 40c each; \$4.00 per dozen.

Hicks (Everbearing)—Description and price same as New American.

Russian Mulberry—(Seedlings) 18 to 24 inches, 50c per dozen; \$2.00 per 100.

STRAWBERRIES.

Every family should be supplied with an abundance of this early and healthful fruit. The following list comprises the best varieties, from early to late.

Those marked "P" have imperfect blossoms, and should be planted near one of the Staminate varieties to insure heavy yields.

Give thorough cultivation and mulch lightly at approach of freezing weather.

	DOZ.	100	1000
Warfield —[P] early, dark red, fine for market.....	25c	\$1.00	\$5.00
Lovett —Large, early, productive, desirable for fertilizing pistillate varieties.....	25	1.00	5.00
Haverland —[P] large, long, fine for home use.....	25	1.00	5.00
Bubach —[P] very large, light red, early, excellent.....	25	1.00	
Bisel —(P) large, bright red, plant is perfect.....	25	1.00	5.00
Robinson —Large, late, bright red; one of the best for market.....	25	1.00	5.00
Staples —A seedling of Warfield, with a perfect blossom. Remarkably vigorous and productive. Berries of medium size, dark red, and of fine quality.....	25	1.00	5.00
Gardner —Originated in Northern Iowa. Plant vigorous and productive. Blossom strongly staminate. Fruit large, firm and of fine flavor.....	25	1.00	
Splendid —One of the best. Fruit large, light red, fine.....	25	1.00	
Marshall —Unquestionably the finest strawberry yet offered. Fruit of largest size, firm, high quality.....	35	1.50	
Wm. Belt —A new variety. "In productiveness, size, beauty and quality the Wm. Belt will scale higher than any other variety I ever raised."—M. Crawford.....	35	1.50	

RASPBERRIES.

Loudon —Originated in Wisconsin. Perfectly hardy. Fruit large, bright red and of excellent quality.....	50	2.00	
Kansas —Early, very large, vigorous, hardy and productive. Berry firm; excellent shipper. I received an award at the World's Fair on an exhibit of Kansas Raspberries.....	50	2.00	10.00
Older —A new Black Cap originated in northern Iowa. Very large, early and productive. Prof. Bud says: "It is the best of the Black Cap for desert use or canning....."	50	2.00	
Eureka —Tested for 15 years. Claims—1st. large as Gregg; 2nd. early as Palmer; 3rd. better quality than either; 4th. will produce as much as Gregg and Palmer together.....	50	2.00	
Mills —A seedling of Gregg but superior to that variety in hardness, quality and yield. A leading grower says: "The Mills Raspberry the past season has been a growing success on my grounds. I picked from a hill of four canes 7½ quarts. Think of that, at the rate of 18,000 quarts to the acre?" Believing this to be the best late Raspberry yet introduced, I have grown a fine stock of plants and offer them at a price within the reach of all.....	50	3.00	15.00
Columbian —Very large. Purple. Does not crumble like Shaffer, fine for canning.....	50	3.00	
Cumberland —"The Business Black Cap." See special circular; 30c each; \$3.00 per dozen.			

BLACKBERRIES.

	EACH	DOZ.
Snyder —Hardy, reliable, the best for general planting.....	50c	\$2.00
Stone's Hardy —Late, valuable.....	50	2.00
Ancient Briton —Vigorous, hardy, productive, excellent.....	75	2.00

GOOSEBERRIES.

This healthful fruit is now receiving increased attention, and no fruit garden is complete without an assortment of the best varieties. The English varieties succeed best in a partial shade and should be planted on a north slope or among orchard trees.

	EACH.	DOZ.
Houghton —Pale red, medium very productive, 2 years.....	15c	\$1.50
Downing —Pale green, medium to large, strong grower, productive and popular, 1 yr. 2 yrs.....	10 15	1.00 1.50
Champion —An American variety, medium to large, pale red. Bush very vigorous and productive. 1 yr. 2 yrs.....	15 20	1.50 2.00

Red Jacket —Large, dark red, vigorous, very productive and of excellent quality.		
1 yr.....	30c	\$3.00
2 yrs.....	40	4.00
Pearl —New, large, pale yellow, fine quality. Plant vigorous, healthy and unsurpassed in yield, 2 yrs.....	30	3.00
Columbus —A new American seedling of the English type. A strong grower with healthy foliage. Fruit large, oval, greenish yellow and of finest quality. 1 yr.....	30	3.00
2 yrs.....	50	5.00
Chautauqua —This is another seedling of the English type. Plant vigorous, fruit of the largest size, oval, pale yellow, sweet and of exquisite flavor. 1 yr.....	30	3.00
2 yrs.....	50	5.00
Industry —Fruit very large, oval, dark red. Plant vigorous and productive. Conceded to be the best English variety for general planting. 2 yrs EXTRA..	30	3.00

CURRENTS.
